SUMMARY

I am an aspiring self learning web developer looking for opportunities to learn and gain experience in the tech world.

SKILLS

Languages: HTML, CSS, JavaScript, ES6+

PROJECTS

Rock Paper Scissors

github.com/Tylerp10/rock-paper-scissors

A simple game of rock paper scissors played against the computer. Player has the freedom to choose one of the options while one is randomly selected for the computer, a winner is determined after each round along with updating the scores. Made with HTML, CSS, and JavaScript.

Calculator

github.com/Tylerp10/calculator

A simple yet clean design of a fully functioning calculator. Includes the 4 basic mathematical operators and is capable of calculating any equation entered. Works and looks perfectly on a desktop and mobile device. Made with HTML, CSS, and JavaScript.

Volleyball Stats Calculator

github.com/Tylerp10/volleyball-stats-calculator

An app specific to calculating attacking efficiencies and serving percentages in volleyball. Takes in three different numbers, such as kills, errors and attempts, and calculates two percentages for each category specific to the skill. Made with HTML, CSS, and JavaScript.

Sports Landing Page

github.com/Tylerp10/odin-landing-page

First project as a self-learning developer. Includes a beautiful and sleek design of a landing page about sports. This page portrays four distinct sections that nicely transition from one to the next. Made with HTML and CSS.
